

Measles (Rubeola) Immunity Waiver

Name _____ A# _____ Date of _____ / _____ / _____
Last First MI (Evergreen ID number) Birth Month Day Year

Address _____ Phone _____

Due to a medical or religious reason, I cannot receive or choose to decline immunization. In the event of a measles case or outbreak on campus, I agree to comply with the Evergreen State College quarantine or isolation procedures, as recommended by the Center for Disease Control and Prevention and the state and local Health Departments. I understand that this will result in my absence from campus for a minimum of 2 weeks from the time of the last diagnosed case, resulting in missed classes, coursework, student employment, and any other campus activity for the duration of the exposure risk, which would be a minimum of 14 to 21 days.

Student name (printed) _____

Student signature: _____ Date: _____

If you believe you have received two doses of MMR vaccine but can not immediately provide documentation, you may sign this waiver until you are able to upload documentation of immunity. Student Wellness Services can change your status at a later date with documentation of immunity (see below).

Please keep copies of your documents for your own records.

Do not send originals of your supporting documentation, we will not be able to provide them at a later date.

Acceptable forms of documentation (*PDFs, pictures, and screenshots accepted; documentation must clearly show your first and last name, date of birth, and dates of vaccination*):

- School Certificate of Immunization
- Immunization records from your health care provider, public health department, or state Immunization Information System (IIS)
- Copy of your immunization card
- Copy of your military immunization record

“Proof of Measles (Rubeola) Immunity” means:

1. Two doses of measles (Rubeola) vaccine received on or after your first birthday, at least one month apart, and not compromised by other vaccines. *Vaccines received the same day as an MMR are fine, but vaccines received less than one month before or after the MMR may compromise (invalidate) the dose.*
2. A blood test showing measles (Rubeola) immunity
3. Diagnosed measles (Rubeola) disease (copy of medical record documentation or health care provider’s signature required)

If you do not have documentation of Measles (Rubeola) immunity, you can:

- Obtain measles immunization(s) or get a Rubeola titer (blood test) from your private health care provider, urgent care provider, pharmacist, or public health department.
- Obtain the Measles (Rubeola) titer blood test from Student Wellness Services at a reduced cost, billable to your student account. Call 360-867-6200 during our open hours for information about current costs and availability.

Upload this form and any supporting documentation to Student Wellness Services (SWS) using the Health eConnect link, located on your my.evergreen.edu homepage. Select “Immunization Record” as the document type when uploading to ensure speedy processing.
