STUDENT ORGANIZATION HOMEPAGE POLICY

Registered Student Organizations (RSOs) currently registered with the Student Activities Office are eligible to apply for a homepage using the college's computing resources. Student organizations may have one account per group, per academic year. Accounts must be renewed annually. Only the recognized coordinator, or their designee, may be the account user/holder. The user/holder must be a currently enrolled student at TESC.

The student organization and the account user/holder are expected to comply with all college policies, as well as federal, state and local laws governing such areas as copyrights, prohibitions against political campaigning with state resources, and prohibitions against pornography. In addition, these resources cannot be used for commercial purposes. These policies shall apply to any links created from a student organization homepage to another. Complete policies are available for examination in the Computer Center and in the Student Coordinator's Handbook. Accounts will be removed if the RSO does not maintain registration status or is found in violation of this policy.

Please review the college's *Use of Information Technology Resources Policy*.
