I plan to pursue a masters degree at some point, but other than that, just see what educational opportunities my life leads me to.

I plan to travel around the world, eventually trying to find an internship or short-term job working for a nonprofit in a developing country. I am not sure exactly what I want to specialize in at Evergreen, and I hope that by taking time between getting my bachelors and going to grad school, I can find my niche.

I want at least a Master's in environmental studies. I also want to focus on anthropolgy with a focus on indiginous cultures around the world but my envir. is first. I will be taking language classes also for when I travel. I might take a photography class so I can take pictures of the places I go and animals I research.
