I am unsure.

I am unsure which I will do first after I graduate; pursue higher education or begin to establish myself in the career if my choosing.

i am torn between a couple of different things. What my plan is to take a couple of random courses, that seem interesting and see what i really grab onto and like, then work on what i want to do from there. so i am really quite undecided.

I am not sure yet, but I would like to work in sexual education, or become a therapist.

Good question. I will see when I get there.

First, let's graduate. Then we'll figure this one out.

At this moment, I have no plans following graduation from Evergreen.

As of now I am unsure, it depends where my field of study takes me.

After I graduate I plan to have some direction as to what I would like to do next, and hopefully the skills to make that direction into a career.

After I graduate I am unsure of what I would like to do, but I think I want to do something in the science field.
